

SHI SHENG

shengshissd@gmail.com ◇ github.com/mikuase-Shi ◇ mikuase-shi.github.io

EDUCATION

Peking University

B.S. in Software Engineering

Sept. 2024 – June 2029 (Expected)

- **Major Coursework:** Convex Analysis and Optimization, Stochastic Processes, Machine Learning, Computer Vision, Embodied AI and General Agents, Introduction to Computer Systems (ICS), Introduction to Database Systems, Compiler Principles, Theoretical Computer Science, Discrete Mathematics, Set Theory and Graph Theory, Probability and Statistics.

RESEARCH EXPERIENCE

Institute for Interdisciplinary Information Science (IIIS), Tsinghua University

Research Intern — Advisor: Prof. Yang Gao

Jan. 2026 – Present

Beijing, China

- Focusing on Visual-Language-Action (VLA) models and Reinforcement Learning (RL) within the context of Embodied AI.
- Investigating scalable learning paradigms and world models for general robotic agents.

Center on Frontiers of Computing Studies (CFCS), Peking University

Research Intern

June 2025 – Dec. 2025

Beijing, China

- Conducted research on robotic manipulation and foundational models for intelligent embodied agents.

SELECTED PROJECTS

[Forthcoming] Theoretical Foundations of Robotics

First Author

Ongoing

- A theoretical study focusing on the fundamental principles of robotics and theoretical machine learning foundations.

[Forthcoming] VLA & RL Integrated Paradigm

Second Author

Ongoing

- An empirical project exploring the integration of Visual-Language-Action (VLA) models and RL for robust embodied intelligence.

SKILLS & OTHERS

Research Areas

Robotic World Models, VLA, RL, Theoretical ML

Programming

Python, C++, Linux (Ubuntu), PyTorch, JAX, Git

Simulation

ManiSkill, Isaac Sim, Isaac Lab

Languages

English (TOEFL Target: 105+), Chinese (Native)
